In Next 12 Months, Address the Next Barriers to AI Maturity

The AI Pivot

Enterprise AI Strategy

Prioritize core business areas to transform

AI-Ready Workforce

Plan and communicate the required changes

AI-Ready Tech Stack

Prepare tech stack for AI and agentic workflows

CIO 100

How the leaders are approaching their AI strategy

AI Leaders

AI Leader: Business model transformation

Roadmap: Transformation across functions

AI Central Group: Orchestrates across enterprise

Governance: Aligns to with strategy to manage AI models, data and security

Prepping the Tech Stack for Agentic AI

80%

Eliminating manual and semi-manual workflows and business processes is a top priority for our agentic AI investments

76%

The current geopolitical uncertainties including changing tariff frameworks will accelerate our efforts to eliminate manual and semi manual workflows

Built-In Security and Governance

Applications for Agentic AI Era

AI agents eventually become apps

- AI agents connect data and workflows within apps
- AI agents become the workflow across apps

How to prepare

- Determine where AI apps adds value
- Reimagine end-to-end workflows spanning siloed applications and functional areas

CIO100

[illegible]

Automation for Agentic AI Era

AI agents eventually orchestrate work

- 6-12 months: AI assistants gain agentic function
- 12-24 months: Coordinate activities
- 24+ months: Orchestrate work

How to prepare

- Agents in existing business automation tools
- AI agents orchestrating and eventually automating multi-step business workflows

Data for Agentic AI Era

Real-time event driven

- **Data synthesis:** automated workflows and insights
- **Data control:** continuous intelligence and policy enforcement
- **Data management:** multi-modal data in motion

How to prepare

- Identify data products required for critical business processes
- Unify data synthesis, control and management technology

CIO100

Infrastructure for Agentic AI Era

Machine scale

- AI-ready infrastructure based on fit-for-purpose operating models
- From human-center IT Ops to AI Ops

How to prepare

- Invest in infrastructure modernization
- ROI that holistically considers requirements for each workload
- AI-assisted and agent driven IT Ops automation
