# OT Security assessments

FUJITSU

Are you ready to digitize with confidence?

Manufacturing and utilities face growing cyber risks as IT/OT (Operational Technology) converge. Securing digital operations to protect data, maximize uptime, and maintain worker safety is not a one off-challenge.

Decision point

60% of orgs	30% of orgs			10% of orgs	
Phase 1	**Phase 2**	**Phase 3**	**Phase 4**	**Phase 5**	**Phase 6**
Awareness	• Outreach • Asset discovery • Network topology • Mapping	Oh wow! moment	Firefighting	Integration	Optimization

Source: Gartner Model – extract from Market Guide for Operational Technology Security

With many organizations still in the early stages of their OT security journey, our OT security offering emphasizes consultative services to provide tailored guidance and strategic direction:

OT assessment and asset discovery: analyzing your existing networks, identifying gaps in compliance and standards, establishing your risk profile while baselining your networked digital assets.

OT security regulatory assessment: assessing your organization's compliance with applicable cyber security laws, regulations, and standards like NIS2 in Europe and NIST 2.0 in US, ensuring appropriate security controls are in place to safeguard OT systems and data.
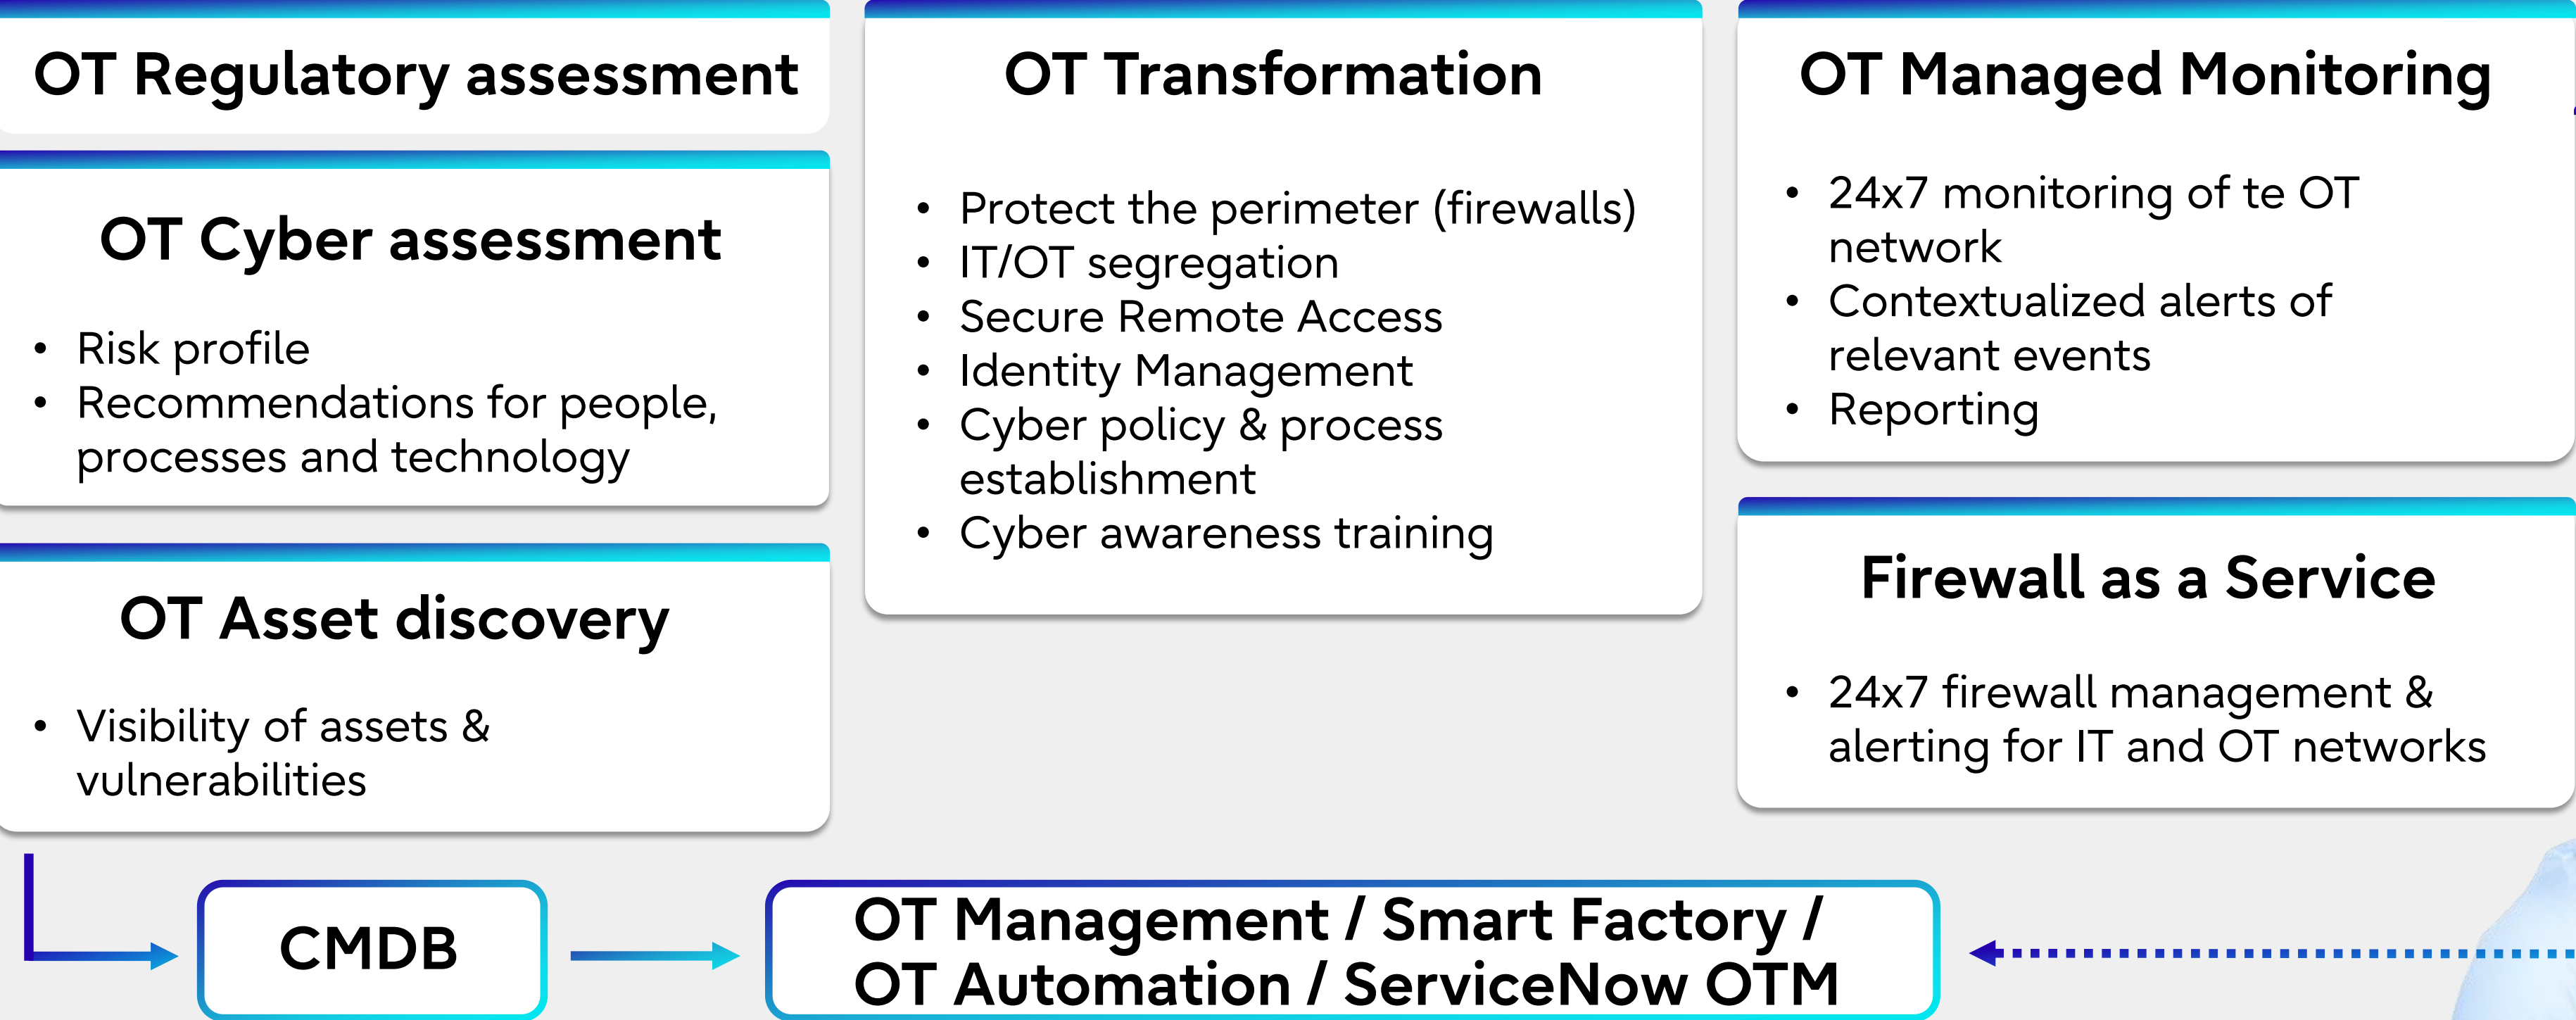

OT managed monitoring service: a 24/7 service identifying anomalous behaviors across OT environments reducing the threat of negative business impact by production outages.

In addition, with **OT security transformation** our services ensure you are able to digitize your production environment with confidence.

How we help businesses to innovate securely without compromising production continuity:

OT Regulatory assessment

OT Cyber assessment
- Risk profile
- Recommendations for people, processes and technology

OT Asset discovery
- Visibility of assets & vulnerabilities

OT Transformation
- Protect the perimeter (firewalls)
- IT/OT segregation
- Secure Remote Access
- Identity Management
- Cyber policy & process establishment
- Cyber awareness training

OT Managed Monitoring
- 24x7 monitoring of te OT network
- Contextualized alerts of relevant events
- Reporting

Firewall as a Service
- 24x7 firewall management & alerting for IT and OT networks

Why Fujitsu?

We make OT cyber security protection available as a service.

A partnership--driven approach with our customers and wider eco-system.

Manufacturing and utilities industry experience, in NIS-D compliance, NIST, IEC 62443 and other sector-specific standards.

Proven credentials in ISO27001 and ISO22301.

40 years of cyber security experience with global and local capabilities.

As well as being a world-class cyber solutions provider, we're also a manufacturer - making us the ideal strategic partner to overcome the cyber challenges you face on the road to digital and sustainable transformation. We offer you a single point of contact to deliver your complete end-to-end OT Digital Transformation.
