

NIS2 compliance assessment

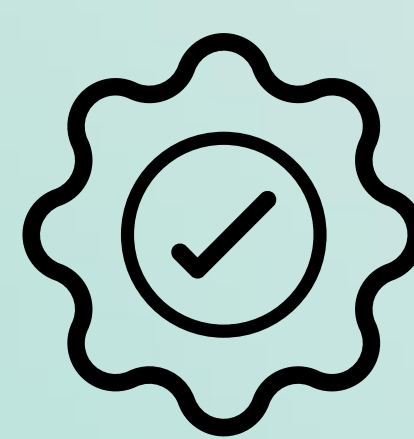

NIS2 compliance – how ready are you?

Many organizations in energy, transport, banking, and healthcare are subject to the NIS2 directive¹. This might require some technical or organizational change. Our NIS2 compliance assessment helps your organization evaluate your readiness against the key requirements of NIS2. We map existing practices to NIS2 obligations, identify gaps and provide actionable recommendations across governance, risk and security domains.

Key features:

Review of compliance across NIS2 core domains.

Evaluation of implemented processes, controls, and documentation.

Identification of non-conformities and risk areas.

Full report with concrete, prioritized remediation recommendations.

We offer consultations and support for NIS2 implementation, led by highly specialized Information Security Managers (ISMs) with extensive cross-sector experience. Our team holds top industry certifications, including CISSP, CISA, ISM, and ISO 27001 Lead Auditor, ensuring trusted, compliant, and effective guidance.

Why Fujitsu?

Global scale and reach

With over 40 years of experience, Fujitsu’s worldwide presence ensures consistent, high-quality security management across geographically dispersed operations.

A holistic approach

We deliver end-to-end solutions co-created with you, supported by expert consulting and underpinned by certified security standards (ISO 27001 and ISO 22301).

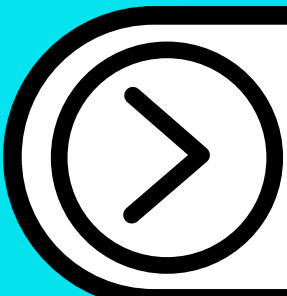

A strong commitment to sustainability

We put sustainability at the heart of everything that we do.
